

DATE: September 17, 2019

TO: Medical First Responder (MFR) Agencies

SUBJECT: Change to Patient Care Report (PCR)

The MFR PCR has been enhanced to make it easier to fill out and a section was added for documentation of medications.

Please familiarize yourself with the new PCR as some fields have been moved, changed, or deleted. For example, there is a new treatment section for administering approved medications such as Naloxone. Due to the update, the PCR reference material on the MFR website will be updated to reflect these changes; along with the PowerPoint for the documentation sessions as part of the MFR competencies. Lastly, departments can still use the continuation form because its format has not been changed.

Please continue to use the old PCRs until you run out, then you can switch to the new version. If you have any questions about the new PCR please contact us at mfrservices@emci.ca. Thank you, for your continued support to the MFR program.

Sincerely,

A handwritten signature in black ink that reads 'Greg Down'. The signature is written in a cursive, flowing style.

Greg Down

MFR Coordinator
